## Introduction

1. Since initial Population Census results have become available the Tasmanian Office of the ABS has received many requests for details about population and dwellings by Hobart suburbs. To meet this demand the ABS has produced this publication which contains the more frequently requested suburban details. It is possible to produce tables other than those contained in this statement, showing census characteristics by various areas. Users interested in other details should contact Lindsay McDougall (phone 20 4472), Ken Watt (20 4437) or Chris Sweeney (20 4974).

## Definition of suburbs

2. There are no official Hobart suburban boundaries nor, in some instances, official recognition of particular suburbs. In determining suburban boundaries for the purposes of this publication the ABS referred to the Hobart Atlas published by the Tasmanian Lands Department. Suburbs were then defined by combining collection districts (CD's). CD's are the smallest geographic unit used to classify census data and hence suburban boundaries to some extent have been governed by the CD boundaries. The suburbs so defined may not conform to boundaries recognised by other bodies and users.

3. The maps attached to this publication show the boundaries of Urban Hobart and suburbs. Details for three suburbs - Bridgewater-Gagebrook, Sorell-Midway Point and Kingston-Blackman's Bay, which are not part of Urban Hobart, are included in this publication as they are generally considered to be residential suburbs of Hobart.

## Urban Hobart

4. Urban Hobart is defined according to criteria established by Dr Linde for the delineation of urban boundaries. These criteria introduced a two boundary concept for delineation of urban centres. For capital cities an outer fixed boundary was established to contain expected urban growth over the next several decades. (For Hobart this is the Hobart Statistical Division boundary.) The second, the inner urban boundary, is flexible and changes as urbanisation moves outwards. The definition is based on population density and is defined to include all contiguous CD's with a population density of more than 200 per square kilometre.

5. In broad terms Urban Hobart comprises the area from Taroona in the south to Granton in the north and includes the Eastern shore suburbs from Risdon Vale southward to Tranmere; Rokeby and Clarendon Vale are included.

## Confidentiality

6. The ABS has a long and continuing history of protecting the confidentiality of information which it receives from individuals and businesses. This policy is pursued not only for legal and ethical reasons but also because successful collection of data depends on the goodwill and co-operation of respondents. One of the methods used to achieve confidentiality of data from the 1981 Census is the introduction of small random adjustments to tables.

7. In brief, the ABS applies random error adjustment to non-zero cells. This adjustment is also made to totals and hence sums of components may be slightly greater or less than totals. The result of random error adjustment is:

- no reliance should be placed on cells of 5 or less in tables;
- some cells are randomly altered to zero;
- when calculating percentages or proportions the random error can be ignored except for very small cells;
- the amount of detail that can be released from Census is maximised.

8. A further description of the effects of random error adjustment is contained in the ABS information paper: 'Census 81 - Effects of Introduced Random Error' Catalogue

no. 2156.0. This publication is available from all ABS offices.

9. For reasons of confidentiality the ABS also restricts the level of detailed cross-classified data which it releases. Generally the level of detail available is less for areas with small populations than large population areas. For example the amount of detailed cross-classified data that can be released for Hobart Statistical Division is greater than for individual suburbs.

## Definitions

10. Occupied Private Dwelling : is normally a house, flat or room (but can also be a tent, houseboat or caravan on a separate block) occupied by a person or group of people who live together as a single domestic unit. It excludes establishments such as hotels, motels, boarding houses, caravan parks, etc.

11. Family Income : is the sum of the incomes of the head and spouse of a family where both are present. Where the family normally consists of a head and spouse but one or the other is not at home on census night the census will show only a family head and family income will be the income of the head. It does not include the income of other family members such as children and other relatives.
